BALI'S SHOP • SPOT GUIDE

## CUCA

*"If you're looking for a new place with a different atmosphere and unique yet delicious dishes, Cuca is the answer."*

Just opened a few months ago, Cuca offers something fresh and distinctive yet delightful food using only the freshest and 100% local ingredients available in the market.

The menu consists of tapas, desserts and cocktails that can be enjoyed at one of the three distinctive spaces in the restaurant: food bar, dining room and cocktail bar & garden lounge. If you love fish, the 'emperor ceviche' served with watermelon ice, roasted pumpkin seed and basil is just delicious paired with their refreshing moon-aria. Other must-try dish is the bbq octopus served on top of asian gazpacho, fresh apple, caramelized cauliflower and coriander. The taste is as good as the presentation.

Other favorite is the crispy fried chicken, which sounds very common, but once you taste it, you know it's unlike anything you've ever tasted. The wild honey, country coleslaw, sesame dust and Asian basil served with the chicken are definitely the right condiments to complement the taste.
